# Smoothwall for Health and Social Care

---

Protecting over 100,000 NHS staff with safe internet access

---

The UK Health and Social care sector is constantly facing unique challenges when trying to ensure safe internet access for its clinical and non-clinical staff, patients and visitors. Organisations need to be able to secure their environments whilst maintaining a satisfactory online experience for users wanting to freely browse the web.

Our experts understand the challenges health and social care organisations face and our web filtering solutions are designed to provide custom, safe and secure internet access which has benefits for both staff welfare and patient rehabilitation.

If you require firewall and security, our UTM range offers you the complete protection package, if you have an existing firewall, our SWG web filter integrates easily. As a truly scalable solution, we have products appropriate for all sizes of network.

**“The reason we chose Smoothwall? Cost, power, ease of use, compatibility and clustering capabilities for no extra cost.”**

Shrewsbury and Telford Hospital NHS Trust

# Key Features

## Granular Categorisation

Allows the application of different filtering rulesets per user group, providing multiple levels of categorisation.

## Guest WiFi Authentication

Ensuring your patients and guests are authenticated provides safe and secure access to the web, which can even help support patient rehabilitation.

## Gateway Anti-Malware

Our market leading anti-malware solution powered by BitDefender will protect your network from web borne malware attacks and includes HTTPS protection.

## Application Control

Filtering of non web-based applications by identifying over 100 common application protocols, enabling you to allow or block them.

## Bandwidth Management

Intelligently manage and allocate your bandwidth to minimise the impact media and file sharing can cause, and optimise cloud based applications without the need to fully block services

## Audit Level Reporting

With full visibility of web activity on your network, you can provide information governance reports and any freedom of information requests, in real time by using any of the 300 report templates.

# The Next Step

As a UK Health and Social care specialist provider, we understand that budget is key, therefore we will always actively work with you to fully understand your requirements, helping you to create a bespoke solution that is right and works for you.

# A Solution that Benefits Everyone

# The Future of Health and Social Care

## Patient

By providing a safe and secure WiFi service we can ensure an improved quality of stay for your patients, while helping you deliver the first class consumer-grade service that they expect.

## Provider

As a provider we can help you maintain or improve your quality of service, alongside a reduced workload overhead, whilst still staying within your target budget.

## Payer

Our solution will help you to reduce your overall costs, help you manage quality and aid you in increasing your organization's bottom line.

## Policymaker

Abide to the policies set by the government to digitise the British health and social care service in line with budgetary requirements and consumer expectations.

The era of digital transformation for both health and social care is fast approaching. More and more systems and products are being designed with the end goal in sight of being able to connect to the internet safely and securely, but what does this mean to health and social care organisations now and in the future?

If implemented correctly, these services will provide patients and providers with a number of added benefits. These added benefits could include the use of mobile medical applications, e-prescriptions and even the introduction of self-monitoring wearable devices. Hospitals will also benefit from the ability to keep tabs on the location of medical devices, personnel and patients, leading to a reduction in workload and costs.

Here at Smoothwall we are fully committed to staying ahead of the latest industry trends within the Public Sector and we pride ourselves on pro-actively addressing these trends before they affect your organisation and your customers.
